SUMMARY

AI Engineer who builds LLM systems that business teams can trust with real numbers. In my first four months at **SRP Polypack**, I designed and shipped two bilingual Thai/English assistants, **PackMind** (sales) and **ProcureX** (purchasing & accounts payable), that answer staff questions directly from company MySQL databases. Hands-on across the full lifecycle: tool-calling agents, evaluation, FastAPI and Next.js services, React interfaces, security and CI/CD. B.Sc. Digital Innovation (**GPA 3.61**), Google Advanced Data Analytics certified, and comfortable working in Thai, English and Burmese.

KEY HIGHLIGHTS

- **2 LLM assistants deployed internally in 4 months** as a new-graduate AI Engineer, built for the sales, purchasing and accounting teams.
- **Trustworthy answers on business data:** built safeguards so every number in an AI answer comes directly from company data, giving managers figures they can rely on for decisions.
- **Measured, not guessed:** KOL Matcher ranking reached precision@5 of 0.80 vs 0.13 for a follower-count baseline, with ablations proving which signals matter.

SKILLS

LLM & GenAI: Tool/function calling, text-to-SQL agents, RAG, prompt engineering, numeric grounding & hallucination guards, structured output validation (Pydantic), LLM-as-judge, multi-provider fallback · OpenAI GPT-4.1, Groq, Gemini, Mistral, OpenRouter

ML / NLP: PyTorch, TensorFlow, Keras, scikit-learn, XGBoost, CNN, Transfer Learning, SMOTE, wav2vec2, sentence-transformers, Thai text matching (character n-gram TF-IDF)

Evaluation & Analytics: precision@k, nDCG, MAP, ablation studies, A/B testing, Chi-Square, Bayesian analysis, EDA · pandas, NumPy, BigQuery, Plotly, Seaborn, Matplotlib

Backend & Data: FastAPI, Flask, Next.js API routes, REST APIs, MySQL, PostgreSQL, Supabase, SQLAlchemy, Apify, BeautifulSoup

Frontend: React 19, Next.js (App Router), TypeScript, JavaScript, Tailwind CSS, HTML5/CSS3, responsive UI · data dashboards & KPI cards (Recharts, Plotly), chat interfaces with Markdown rendering, multilingual UI (EN/TH/JP), light/dark themes · Streamlit (custom HTML/CSS), Flutter

DevOps & Testing: GitHub Actions, CI/CD, Docker, Docker Compose, Jenkins, Linux, Nginx, PM2, JWT, SSO, role-based access, pytest, Vitest, MLflow, Git

Languages: Python, SQL, TypeScript, JavaScript, C#, Dart, HTML/CSS

Spoken: Burmese (Native), English (Upper Intermediate), Thai (Intermediate), Japanese (Basic)

EXPERIENCE

AI Engineer — SRP Polypack Co., Ltd. — July – November 2026

Rayong, Thailand · Full-time

PackMind AI — Sales Analytics Assistant

Python · FastAPI · LLM tool calling · React · TypeScript · MySQL · JWT · SSO

- Designed and delivered a bilingual Thai/English AI assistant that lets the sales team ask questions in plain language and get answers **directly from company sales data**, replacing manual report requests.
- Key features: natural-language-to-SQL querying, KPI cards and charts, conversation history with follow-up questions, and secure role-based access through company single sign-on.

ProcureX — Purchasing & Accounts-Payable Assistant

Next.js · React · TypeScript · OpenAI GPT-4.1 · MySQL · Tailwind CSS · Recharts · GitHub Actions · Nginx

- Designed and delivered a bilingual Thai/English AI assistant for the **purchasing, management and accounting teams**, answering questions on purchase requests, purchase orders, suppliers and payables from the company's purchasing database.
- Key features: an AI agent that queries live data, automatic comparison dashboards (period vs period, by team or supplier), answer accuracy checks, and protection of sensitive financial and personal data.

Data & Marketing Intern — Thonburi Bamrungmuang International Hospital **Jun – Aug 2025**
Bangkok, Thailand · Internship

- Turned raw multi-channel campaign data into clean reports the marketing team used to compare campaign performance.
- Standardised reporting inputs across marketing and data functions, reducing repeated manual cleanup between reporting cycles.

SELECTED PROJECTS

DermaScan — Skin Analysis Application
Python · OpenCV · Flask · PostgreSQL

- Built a bilingual (EN/TH) full-stack web app that identifies skin type by combining computer-vision image analysis (HSV thresholding, Haar Cascade face detection, Laplacian sharpness) with a dermatologist-validated questionnaire.
- Includes user authentication and an admin dashboard.
- Live app: skin-analyzer-71o0.onrender.com

KOL Matcher — AI Creator Matching for Thai TikTok
Python · Streamlit · Groq / Gemini / Mistral / OpenRouter LLMs · Pydantic · Apify · scikit-learn · pytest · GitHub Actions

- AI tool that reads a brand's website and Facebook page, builds a brand profile with an LLM, and returns a **ranked, explained shortlist of Thai TikTok creators** with CSV/JSON export.
- Scores each creator on 5 explainable signals (content relevance, engagement, audience fit, budget fit, consistency) plus an AI voice-fit check; reached **precision@5 of 0.80 vs 0.13** for a follower-count baseline.
- Thai text matching with character n-gram TF-IDF, brand-safety screening, 4-provider LLM fallback with Pydantic validation, and a run log of tokens, latency and cost.
- Live app: kol-matcher-yor9umr9l8wuftchvpsrxg.streamlit.app

A/B Testing Analysis — Google Analytics 4
BigQuery · SQL · Chi-Square · Bayesian Analysis

- Analysed 84,000 sessions across a 28-day experiment; Variant B produced a **+18.4% conversion-rate uplift at 96.9% confidence**.
- Confirmed the result under both frequentist and Bayesian frameworks and published it as an interactive web report.
- Live report: a-b-testing-with-google-s-ga4-public-mern.onrender.com

Sigma Study — AI Flashcard Generator
Next.js 14 · React · TypeScript · Tailwind CSS · Groq LLM API · Supabase (PostgreSQL, Auth) · Vercel

- AI study app that turns uploaded notes or PDFs into a **study guide and flashcards** in 9 languages, with SM-2 spaced-repetition review like Anki.
- Key features: AI quality check that scores every card before saving, "Ask my notes" search with source citations (RAG), progress dashboard, Focus Mode, Anki export, and secure accounts with row-level security.
- Live app: sigma-study-bice.vercel.app

CERTIFICATIONS

- Google Advanced Data Analytics Professional Certificate — Google, May 2026
- Google Data Analytics Professional Certificate — Google, January 2026
- Developing AI Applications with Python & Flask — IBM, July 2025
- Supervised Machine Learning: Regression & Classification — DeepLearning.AI + Stanford, May 2025
- Introduction to DevOps — IBM, February 2023

EDUCATION

B.Sc. (Digital Innovation) — Rangsit University, Thailand **Aug 2023 – May 2026**
GPA 3.61 · College of Digital Innovation Technology · Degree conferred 14 May 2026

Relevant coursework: Machine Learning · Artificial Intelligence · Data Structures & Algorithms · Database Systems · Data Communication & Networks · API Design & Development · Container Development

LEADERSHIP & COMMUNITY

Classroom Coordinator & Event Organiser — Rangsit University **2023 – 2024**

- Coordinated classroom logistics and faculty communication for the cohort, and co-organised the Thingyan (Burmese New Year) cultural festival — managing volunteers and cross-cultural coordination across student groups.
